

Why Data Delivery?

A lightning-fast, stable & secure ETL method.

15 minutes
average processing speed

- ✓ Easier to manage data complexity
- ✓ Increase ETL process speed up to 10x
- ✓ Reduce ETL delays and errors

	Essentials	Professional
Customization	<ul style="list-style-type: none">✗ Bulk “dumb” extractions✗ Rigid delivery	<ul style="list-style-type: none">✓ Delta-based✓ Can identify deletes and changes in the system✓ API Flexibility✓ Can support one-time data extracts if needed
Speed	<ul style="list-style-type: none">✗ Nightly data pull times✗ Time consuming✗ Unstable (can go offline)	<ul style="list-style-type: none">✓ Shortened extraction times✓ Ability to be updated at client's preferred frequency✓ Aggregate the data in one place for one centralized pull across data and tables✓ New columns and fields
Access	<ul style="list-style-type: none">✗ Need to stand up own server to provide access to partners	<ul style="list-style-type: none">✓ Centralized place for data access core Vertafore products✓ Partners can access via API
Change management	<ul style="list-style-type: none">✗ For product releases, need to take the VPN down while waiting for the upgrade	<ul style="list-style-type: none">✓ Data extracts identify changes with a new product release, reducing re-work times when upgrading your core systems

“The Vertafore team was really great. We were partners throughout the process and everyone was very engaged.”

With Vertafore's Data Delivery, Renaissance cut down their ETL time from 6 hours to 15 minutes.
