

ImageRight Online

Reduce operational complexity. Build lasting agility.

ImageRight Online brings the proven information management capabilities of ImageRight to the Vertafore Cloud, combining insurance-specific content and workflow management with the security, resilience, and operational advantages of a SaaS deployment. With Vertafore managing ImageRight operations, organizations can simplify technology administration, stay current with ongoing innovation, and focus more resources on business priorities.

Why ImageRight Online?

Free IT resources for higher-value work
Shift infrastructure, database administration, monitoring, and maintenance to Vertafore's ImageRight and cloud specialists giving your IT team more capacity to focus on business priorities.

Stay current on your terms
Test updates in a UAT environment that mirrors production, while Vertafore manages release preparation and you choose when to adopt supported updates.

Scale with changing demands
Cloud resources scale with operational needs, supported by proactive performance monitoring and optimization.

Strengthen security
Benefit from encryption, continuous security monitoring, and independently audited controls backed by dedicated security expertise.

Build operational resilience
Support business continuity with built-in disaster recovery, managed backups, and ongoing infrastructure monitoring.

Ready for what's next: Velocity™ AI

ImageRight Online is the only ImageRight deployment model supporting current and future Velocity AI agents.

Velocity Document Intelligence Agent automates time-consuming research, finding relevant information across ImageRight documents to deliver summaries and grounded answers.

Discover what ImageRight Online can do for your business.

Connect with Vertafore to explore how ImageRight Online can free your teams to focus on serving customers, improving operations, and moving your business forward.
