

Ditch the spreadsheets and make sense of surplus lines tax filing.

Our intuitive management software combines the best of technology and compliance to ensure your surplus lines filings are completed faster and with more accuracy.

Here's how:

Agency Management System

Our Surplus Lines Tax Calculator API integrates with quote/bind systems.

Get instant tax and stamping fee calculations to reduce errors and costly fees with our

Surplus Lines Tax Calculator API

State Batch Filing via API

Maximize surplus lines filing efficiency by submitting filings directly from Connect[™] to state sites such as NY, CA, FL, and TX. Batch uploading avoids the hassle of re-keying data, thereby saving time and reducing submission error.

Centralize Filing Activities

Easily manage surplus lines tax filings company-wide from a centralized location. Compile and store policy data, manage and assign filing tasks, and easily identify and correct errors across multiple offices or sub-agencies.

Simple AIM[™] Integration Setup

Transfer your policy information from your management system to Connect[™] via our AIM[™] integration, or utilize InsCipher's other convenient methods of data transfer.

Filing & Task Tracker

Connect[™] automatically generates filing, reporting, and payment tasks based on policy data, and auto-assigns those tasks to members of your filing team. Avoid state-imposed penalties and fees associated with missed deadlines.

Surplus Lines Tax Calculator

Tax calculator provides instant tax calculation for all 50 states, and provides state-specific document templates and stamp wording. InsCipher's dedicated compliance team keeps all tax rates, documents, and filing rules up-to-date.
