

Modern content management built for insurance.

ImageRight is the leading Enterprise Content Management (ECM) system built for insurance professionals. It combines claims software, configurable workflows, and powerful Content and Process Automation (CPA) to bring all your documents, images, and data into one intelligent system. With ImageRight, you can connect your content and processes, work smarter, close claims faster, and maintain consistency and compliance across your entire organization.

Features you need:

- **Take control of your content:** Utilize our **intuitive file tree** to easily organize and preserve your claims, underwriting, and distribution documents.
- **Simplify and automate:** Build **custom workflows** with powerful content and process automation to reduce time spent on manual tasks and improve efficiency.
- **Boost your productivity:** With **business process dashboards**, you can monitor employee processes, reduce bottlenecks and gain more knowledge over your business in real time.
- **Access anywhere, work everywhere:** Enjoy a **sleek, user-friendly interface** designed for today's mobile workforce, allowing you to work seamlessly from any location.
- **Expand your ecosystem:** **Robust API functionality and open architecture** connect the products you need and want, easily integrating your favorite Insurtech solutions to that adapt to your unique technology stack.
- **Work smarter in the cloud:** Access **ImageRight Online** through the Vertafore cloud to keep the complexity out of your infrastructure and enjoy greater productivity.

Experience the difference

“[With ImageRight], we've maintained strong relationships and transparency in our workflow and business volume, capturing valuable insights into our partners' needs and focusing our efforts on important tasks with custom priorities.”

Heather Glocke,
People Leader, *UnitedHealthcare*
